Hiring Manager

Tata Consultancy Services (TCS)

Dear Hiring Manager,

I am writing to express my interest in the **Data Analyst position at TCS**. I hold a Master's degree in Computer Science with a specialization in Machine Learning, and I have strong hands-on experience in Python, SQL, Data Analytics, Pandas, NumPy, and Scikit-Learn. My academic background, combined with practical project work and experience teaching programming, has helped me develop strong analytical and problem-solving skills.

In my recent role as a **Teaching Associate at ABS Academy**, I conducted hands-on Python programming sessions and guided students in data analysis and statistical thinking. This role strengthened my ability to explain complex concepts, work with data logically, and complete projects with accuracy. I have also completed an end-to-end **House Price Prediction Machine Learning project**, where I performed EDA, feature engineering, model training, and evaluation.

TCS attracts me because of its strong data-driven culture, innovation, and large-scale analytical solutions that impact global industries. I am confident that my technical skills, combined with my ability to communicate insights clearly, make me a strong fit for the Data Analyst role.

Thank you for considering my application. I would welcome the opportunity to contribute to TCS and further grow as a Data Analyst.

Sincerely,

Darpan Banerjee
