Professional Summary

Data Analyst with hands-on experience in Python, SQL, and Power BI, skilled in building end-to-end data solutions including data cleaning, exploratory data analysis, and dashboard development. Experienced in developing machine learning models and real-time data pipelines to extract actionable business insights. Strong analytical mindset with the ability to translate data into meaningful decisions. Seeking to contribute to data-driven organizations in solving real-world business problems.

Technical Skills

- **Programming & Analysis:** Python, SQL, C, JavaScript, HTML, CSS
- **Machine Learning:** Scikit-learn (Regression, Classification, Model Evaluation)
- **Data Visualization:** Power BI, Matplotlib, Tableau
- **Concepts:** Data Cleaning, EDA, Statistical Analysis, Data Modeling, Dashboarding

---

Education

B.Sc. in Computer Science — MANBHUM MAHAVIDHYALAYA, Manbazar, **2021** | SGPA: 8.87/10
M.Sc. in Computer Science — Sidho-Kanho-Birsha University, Purulia, **2023** | CGPA: 8.88/10

TCS National Qualifier Test (NQT-2026) – 71.36%

Foundation Section: 70.97% | **Advance Section:** 76.19% | **Programming Section:** 67.70%

Certifications

Diploma in IT | Mathematics in Deep Learning | Data Analysis using Python

---

Work Experience

Assistant Professor – Computer Science and Technology

ABS Academy, Durgapur, WB
(*March 2025 – Present)*

- Conduct hands-on training in Data Analysis and Machine Learning using Python (Pandas, NumPy, Scikit-learn)
- Perform data cleaning, exploratory data analysis (EDA), and visualization on structured datasets
- Demonstrate regression and classification models with real-world datasets and evaluate performance metrics
- Guide students in building end-to-end data analysis projects including preprocessing, modeling, and interpretation
- Develop practical assignments focused on SQL queries, data transformation, and insight generation

Network Administrator

Sarthak Educational Trust-16678 (TCS Examination Centre), Durgapur, WB
(March 2025 – Present)

- Managed network infrastructure and system configuration for large-scale online examinations
- Monitored system performance and ensured zero downtime during critical operations
- Performed troubleshooting of network connectivity, system security, and hardware issues
- Coordinated technical setup to maintain seamless examination workflow

Projects

House Price Prediction (Machine Learning)

- Built regression model using Python and Scikit-learn to predict housing prices
- Performed data cleaning, feature engineering, and model evaluation
- Achieved strong predictive performance using cross-validation techniques through regression.
- Achieved R^2 Score of 0.67 using Linear Regression and 0.50 using optimized Random Forest model
- Implemented end-to-end ML pipeline from data preprocessing to model evaluation
- GitHub: https://github.com/Darpan2000-web/House_Price_Prediction_Project

Weather Data Pipeline & Visualization System

- Designed and implemented an end-to-end ETL data pipeline to collect real-time weather data using API integration
- Transformed raw JSON data into structured format using Python and Pandas
- Stored processed data in a SQLite database for efficient querying and management
- Developed a Flask-based web application to dynamically display weather insights
- Built a modular and scalable pipeline architecture (Extract → Transform → Load)
- Implemented location-based data fetching to support dynamic user queries
- Strengthened understanding of data engineering concepts, backend development, and API handling
- GitHub: https://github.com/Darpan2000-web/weather-data-pipeline

Salary-Analysis-Career-Recommendation-System

- Analyzed 250,000+ records to identify key factors influencing salary using EDA and statistical techniques.
- Performed ANOVA and normality testing to validate significant features affecting salary.
- Discovered that experience, job role, education, and location significantly impact salary, while industry does not develop a salary-based profiling system to identify required experience, skills, and roles for different salary levels.
- Created education-based career mapping to analyse how academic background affects job roles and compensation.
- Designed an ML-ready framework for salary prediction and career recommendation system
- GitHub: https://github.com/Darpan2000-web/Salary-Analysis-Career-Recommendation-System

Data Analysis Projects

- Designed and developed an interactive Power BI dashboard to analyze retail sales performance
- Implemented KPI metrics (230M sales, 286K profit) and region-wise analysis to support decision-making
- Applied data transformation and modeling techniques for accurate reporting
- Enabled dynamic filtering using slicers (city, state, sub-category) for deep-dive analysis
- Delivered actionable insights on regional performance and product category trends
- GitHub: https://github.com/Darpan2000-web/Sales-Data-Analysis-for-a-Retail-Store

Frontend Web Development

- Developed Amazon and Netflix UI clones using HTML, CSS, JavaScript
- GitHub: https://github.com/Darpan2000-web/webpage_clone

Additional Information

- Open to relocation across India for Data Analyst opportunities
- Available for full-time corporate roles
- Actively building advanced analytics portfolio (SQL, Python, Power BI)
- Strong analytical and problem-solving mindset with continuous upskilling focus
